

Welcome to the SESC WVDE

School Bus Operator Training Program

The purpose of this site is to provide assistance to trainees who have been selected by the county transportation departments to be trained to operate a school bus.

This process begins with the county submitting approved trainee applicants to the SESC office. Only approved county applicants will have access to the SESC training. SESC does not select or employ the individuals recommended to be trained.

Trainees may use this site to access helpful materials that will be useful in the training process and in obtaining school bus operator certification.
